

The 2nd International Sport Science Symposium on “Sport Sciences for the Promotion of Active Life”

【Keynote Lecture I】

Graduate Studies in Kinesiology at the University of Calgary

Darren Stefanyshyn

The University of Calgary, Canada

Sport Sciences, 7, 34, 2010

Received: 24 April 2010, Accepted for publication: 24 April 2010

The University of Calgary is one of Canada’s top research intensive universities. It is home to 17 faculties and over 28,000 students. Within the University of Calgary, the Faculty of Kinesiology supports our society in its pursuit of health, fitness, and well being to increase our quality of life, maintaining health, reducing injury and disease.

The Faculty of Kinesiology is committed to training professionals who will have a strong foundation in the study of movement and sport health, both theoretically and practically.

The Faculty is home to over 500 undergraduate and 65 graduate students. Research, education and practice integrate to give students a truly unique and powerful learning experience. Graduate education strengths within the faculty include the following general areas: Biomechanics, Health and Exercise Physiology and Clinical Sports Medicine. Some of the ongoing graduate student research includes investigation into musculoskeletal health, obesity, movement control, sport equipment, psychosocial well being, rehabilitation, genetics, injury prevention and nutrition.
